Claims Letter for UNIRAK

Universal Telescopic Bed Rack App.# 09/922,529

What I claim as my invention is: I, Cody Lambert have invented an apparatus that is used in the bed of a pickup truck to support one or more bicycles. When the apparatus is not being used in the bed of the truck, it can also be used for storage in ones garage or at a campsite while camping.

Also, the apparatus does not require the removal of the front wheel from the bicycles. The retention device that keeps the bicycles from rolling out of the rack is unique in itself.

Universal Telescopic Bed Rack (UNIRAK)

#4

The title of the invention UNIRAK is unique because of the versatility of the invention. The UNIRAK has more than one application, so states the name UNIRAK.

CROSS-REFERENCE TO RELATED APPLICATION:

The UNIRAK (universal telescopic bed rack) application number 09/922,529 is in precise accordance with the title of the invention.

NO FEDERALLY SPONSERED RESEARCH OR DEVELOPMENT:

NO REFERENCE TO A MICROFICHE APPENDIX:

BACKGROUND OF THE INVENTION:

The field of endeavor that pertains to the aforementioned invention consists of the use of a bike rack in the bed of a pickup truck that does not require the removal of the front wheel. This allows for the bikes to remain in the upright position, and does not require the removal of the front wheel so as to transport the bicycles, and to store them in the garage or elsewhere. This is seen in the pictures of the rack contained in the application packet retained by the office of the PTO.

BREIF SUMMARY OF THE INVENTION:

The UNIRAK does what no other bike rack on the market does. It can be used to transport bicycles in the bed of a pickup truck or it can be used for storage of the bicycles in the garage or at a campground or in the hull of a boat. This allows for utilized space and allows for the remaining space to be used in any other manner. The UNIRAK also

Helps keep the bikes in top shape not allowing them to rub against the other bicycles and become damaged in any way. Without the use of the UNIRAK system placing more than one bicycle in the bed of a pickup truck guarantees damage to spokes, gear de-railers, and chains thrown off of sprockets.
